Installation Drawing

1125-DA (Compression) **81125-DA** (Ceramic)

The widespread sink faucet is made with individual cast brass valves connected by nylon reinforced tubing. The center distance of the faucet can be adjusted from 6 to 24 inches. The spout is cast brass and has a polished copper, nickel and chrome plated finish. The stems are all brass, with a double O-Ring seal and rubber seat washer (for compression stems) or ceramic sealing discs (for ceramic units). The O-Rings and seals are rubber. The round canopy handles and the escutcheons are zinc die cast with a chrome plated finish. The spout is equipped with a water saving aerator that limits the flow rate. The pop-up drain is brass with a chrome plated finish. The stopper and guide assembly can be easily removed for cleaning.

Flow Rate: 2.2 gpm @ 60 psi
 ASME A112.18.1M
 ANSI/NSF 61/Section 9 Certified
